

Senior Quality Engineer – Kiva Mobile Fulfillment System Quality Engineer

Kiva Systems, Inc. is a rapidly growing Boston area robotics company that is revolutionizing supply chain operations. The Kiva Mobile Fulfillment System uses hundreds of mobile robots to automate distribution centers, dramatically increasing both productivity and flexibility. Our customers are national retailers, large catalog operators, e-commerce and other companies that ship direct to consumers, businesses and retail stores. Please see www.kivasystems.com for more information about us.

The Kiva software team is developing a complex material handling software application for deployment in large-scale customer factory solutions. The fault-tolerant and scalable server-based application consists of many modules and user interfaces running across a set of client PCs. The application includes a high-performance, real-time database and is used for the control of semi-autonomous mobile robotic vehicles.

For our growing team, Kiva is seeking a talented and motivated hands-on Senior Quality Engineer. The ideal candidate will possess good communication skills, and enjoy problem solving both independently and in team settings. This candidate should be incredibly sharp and possess the desire, drive and energy that is needed to launch new products on short time lines.

As a Kiva System's Quality Engineer you will be responsible for:

- Writing feature and system level test plans based on functional requirement documents
- Having a desire to jump in and execute a diverse set of manual tests as needed
- Participating in test plan reviews in order to identify weaknesses with new test plans and test strategies, making improvements as necessary
- Automating system level test plans
- Being a team player willing to identify and promote QA best practices inside the QA group

The ideal candidate will have the following qualifications:

- Bachelors Degree in CS or equivalent
- 5 years QA related work experience
- Bachelors Degree in CS or equivalent
- 1-2 years experience with test automation
- Expect, Perl or Python experience
- CentOS and Ubuntu OS experience

Please send qualified resumes to jobs@kivasystems.com with your name and the position title on subject line.
