

Product IT Developer

Kiva Systems, Inc. uses game-changing automation technology for distribution centers that helps companies simplify operations and reduce costs while increasing strategic flexibility. Using hundreds of autonomous mobile robots and sophisticated control software, the Kiva Mobile-robotic Fulfillment System enables extremely fast cycle times with reduced labor requirements, from receiving to picking to shipping - all without conveyor. The result is a building that is quick and low-cost to set up, inexpensive to operate and easy to change anywhere in the world. Check out our website (www.kivasystems.com), find us on YouTube, or become a fan on Facebook to learn more about who we are and what we do.

Kiva Systems is looking for a talented and motivated IT generalist with strong scripting skills. This person will be responsible for developing and maintaining configurations of information technology components that are implemented as part of our product offering. He/she must have good communication skills and enjoy problem solving both independently and in team settings. Further, this candidate would be familiar with fast growing companies and the associated deadlines and high-energy culture that go along with launching new products. You will be challenged intellectually and have a good time while you are at it!

As a Kiva Systems Product IT Developer you will be responsible for:

- Creating and maintaining system images of servers, virtual machines and PCs
- Creating and maintaining scripts to allow for rapid deployment and updating of servers and PCs
- Develop and incorporate scripts and tools for monitoring system and network health
- Validating operating system, 3rd party applications and 3rd party firmware updates and patches

The successful candidate for this position will have the following qualifications:

- 5 – 10 years experience
- BS or MS degree in CS/EE or equivalent
- Experience with the following:
 - o RedHat Linux, including RH Cluster Suite
 - o Windows
 - o VMware
 - o Nagios script writing
 - o Automation scripting, utilizing bash shell scripting, python and/or perl
 - o MySQL administration
 - o Blade server technology (IBM Bladecenter experience preferred)
 - o Cisco IOS
- Deep understanding of TCP/IP and network configuration
- Strong problem solving and trouble shooting skills and an ability to come up with creative solutions to difficult-to-solve problems
- Attention to detail
- Extremely organized
- Self driven, team player, with good communication and documentation skills

Send qualified resumes to engineeringjobs@kivasystems.com and put the job title and your name on the subject line.
